*Includes: lunch & conference proceedings.*

### Extras\*

**Extra Banquet Tickets** \$40.00

**Extra Conference Proceedings** \$15.00

**SSCA Members  
Discount - \$50!**

## Featured Speakers

### Ivo Mello

Ivo Mello, Brazilian No Tiller, has devoted most of his career to working toward the evolution of the farming system aiming for the simultaneous achievement of a larger level of productivity, profit and sustainability. He will discuss how to improve your farming system by making a paradigm change. Ivo will move your thinking from soil tillage to grow plants to a new paradigm that avoids tillage and emulates nature as much as possible but always based on science, on a better understanding of nature and on the full and proper utilization of all type of modern technologies. At the same time he will look at increasing productivity, profit and sustainability and even getting into an "agroecosystem components improvement phase".

### Dick Wittman

Dick Wittman manages a large-scale dryland crop, range cattle and timber operation in northern Idaho in partnership with three other family partners. He also provides seminars, workshops, and private consulting services on a part-time basis to agricultural lenders, agri-businesses and farmer/ranchers. Dick is a firm believer in the preservation of the family farm as the preferred entity to manage and steward our food production industry. This belief has been a primary driver in motivating me to help family farmers adopt more professional management practices. Improved performance, teamwork, and quality of life is easily attainable if one develops a clear vision of how to incorporate improved management practices and invest in the effort to change. "God helps those who help themselves."

The Saskatchewan Soil Conservation Association wishes to thank our sponsors for their generous support.
